

Dean's Greenhouse Raised 4x8 Bed Vegetable Garden Plans

Stop in dean's greenhouse for our exclusive 4x8 garden bed kits and all the plants or vegetable seeds you need for these garden plans. Our friendly staff is ready and eager to help you get started with raised bed gardening this year!

Bountiful harvest garden: We have selected those vegetables that, from our experience, yield consistently and heavily throughout the growing season. You can maximize your space by using bush varieties of vegetables and replanting cool temperature crops again in the summer for an additional fall harvest. Your neighbors will be so glad you started gardening as you share with them all summer from your own backyard!

Cook's garden: This garden will provide you with a wonderful selection of fresh herbs and vegetables that will make your summer salads, stir-fries, or grilling recipes burst with flavor. Tasty peppers, tomatoes, basil and cilantro for salsas; squashes, beans and broccoli for stir-fries; lettuce, Swiss chard, cherry or grape tomatoes and dill for salads – the possibilities are endless for an endless supply of garden-to-kitchen-to-table treats!

Easy-grow garden: The vegetables and herbs in this garden will surprise you with how easy gardening can be! Root crops like carrots and beets are sown from seed in the spring and harvested in the fall. (No worries about them all summer!) Lettuces, peas and radishes are sown easily in the spring and harvested just a few weeks later, leaving room for the tomatoes and beans- happily growing in cages. Peppers, squashes and cucumbers are planted in late spring and you are harvesting them by mid-summer. You never knew gardening could be this fun- and this easy!

Rainbow garden: Who said vegetable gardens were boring and “just green”?!?! We have chosen beautiful, colorful and delicious vegetables that will not only give you tasty and nutritious produce this summer and fall but will be beautiful to look at as well- from the sunny yellow of your tomatoes, peppers and squashes to the deep, rich purples of your eggplants, peppers, and beans (not to forget purple- or even black- tomatoes!) And every color or hue in between- your garden will be truly a rainbow of colors and flavors!! But never too beautiful **not** to harvest and enjoy!

BOUNTIFUL HARVEST GARDEN PLAN: 4 X 8 BED

Parsley (2)	Beans (2 or 4) when done plant second crop- for fall: radishes or lettuce	Swiss Chard (2)	Leaf Lettuce – (16)-when done leave space for tomato	Leaf Lettuce – (16) when done leave space for tomato	Swiss Chard (2)	Peppers (1)	Summer squash (1)
